

MyOperator Sales Insights Report

KARTHIK MURALI M

DATA ANALYST TAKE-HOME ASSIGNMENT | APRIL
2025

Executive Summary: Key Insights and Opportunities

This report analyzes sales trends, customer behavior, and product performance, offering actionable insights to optimize strategies and drive profitability.

- **Sales Trends:** Peak sales occur around 1 PM - 3 PM and after 7 PM, with **Non-Members** preferring **E-wallet** payments and **Members** using **Credit Cards**.
- **Product Insights:** **Fashion Accessories** and **Food & Beverages** show high demand, while **Health & Beauty** underperforms in both revenue and quantity sold. **Fashion Accessories** generate the highest profits, while **Electronic Accessories** need pricing adjustments.
- **Location-Based Trends:** Yangon leads in **Sports & Travel**, Naypyitaw in **Fashion Accessories**, and Mandalay in **Health & Beauty**.

Business Questions: What the Data Reveals

Sales are **highest during midday** (1 PM - 3 PM) and post-evening (after 7 PM), indicating strong customer engagement during lunch and after work hours.

- Health and beauty products are underperforming as they generate least revenue and also the quantity sold is the least among all categories.

Customer Behavior Patterns by Membership and Payment Preference

Basket sizes for both Members and Non-Members are **mostly similar**.

Members tend to have a **slightly higher average basket size**, indicating a **modest increase in purchase volume**, possibly due to loyalty or incentives.

- **Non-Members** predominantly use **Ewallets** for transactions.
- **Members** show a clear **preference for Credit Card** payments which indicates differing payment behavior—potential for targeted promotions (e.g., Ewallet cashback for Non-Members)

Product Category Performance: Profitability vs Demand

Fashion Accessories generate the **highest profit** per unit sold, while *Electronic Accessories* lag behind. Inventory or pricing strategy may need fine-tuning for low-profit items

- Fashion Accessories and Food & Beverages are the most frequently purchased.
- Helps guide inventory planning and restocking priorities.
- Indicates **demand strength**, not necessarily profit — so pair this with profit/revenue insights in next slides.

Branch & City-Level Trends: Revenue and Product Affinities

- Branch C has slightly higher revenue and income
- Yet profit margins remain fixed
- All branches operate at a consistent 5% profit margin, but Branch C leads slightly in both revenue and gross income—indicating potential higher throughput or better customer footfall.

City-wise trends show Yangon leads in 'Home & Lifestyle', Naypyitaw in 'Food & Beverages', and Mandalay in 'Health & Beauty', suggesting clear scope for location-based product strategies

Hourly Sales Trends: Identifying Peak Engagement Windows

The heatmap shows how sales vary across different hours for each product line. Notably, **Fashion Accessories and Sports and Travel** peak around **13:00** and **19:00**, while **Food and Beverages** sees strong sales at **14:00** and **19:00**. This analysis can help optimize staffing, promotions, and inventory planning based on hourly product demand.

The sales trend by hour reveals **peak activity around 1 PM and 7 PM**, indicating strong midday and evening sales. Conversely, sales **dip notably between 4 PM to 5 PM** and again at 8 PM. Overall, the pattern suggests higher customer engagement during lunch and post-work hours.

Customer Satisfaction Insights by City and Gender

In **Naypyitaw**, the highest average ratings are seen in **fashion accessories**, as well as **home and lifestyle** products.

In **Yangon**, **sports and travel**, along with **food and beverages**, receive the highest average ratings. Mandalay shows the highest average ratings in electronic accessories and health and beauty products.

The box plot reveals that **ratings** are fairly consistent across both **genders**, with no significant differences or trends observed. This suggests that gender **does not significantly influence** customer ratings for the analyzed categories.

Strategic Recommendations: Targeting, Product Mix, and Promotions

Targeting and Audience Segmentation:

Recommendation: Leverage the information about basket size to create personalized marketing strategies. Target customers with larger basket sizes for promotions or loyalty programs.

Improving Health and Beauty Sales:

Health and beauty products are underperforming, so consider revising the product selection, improving marketing strategies, or offering special promotions to boost sales.

Location-Based Product Strategies:

Implement location-based product strategies by promoting Home & Lifestyle products in Yangon, Food & Beverages in Naypyitaw, and Health & Beauty in Mandalay. Tailor marketing campaigns or in-store displays according to the strongest performing categories in each city.

Optimizing Pricing, Promotions, and Category Profitability

Pricing Strategy and Profit Margins:

Electronic Accessories are generating lower profits. Re-evaluate the pricing or marketing strategies for this category to increase profitability. Consider offering bundled discounts with higher-margin products like Fashion Accessories.

Optimize Marketing and Promotions Based on Product Line Demand:

Use hourly sales trends to **optimize promotions** for each product line. For example, since **Fashion Accessories** and **Sports & Travel** peak around 13:00 and 19:00, consider offering **flash sales** or **limited-time offers** during these times to drive more traffic.

For **Food and Beverages**, since sales peak at 14:00 and 19:00, introduce **meal deals** or **combo offers** around these times to increase transaction volume.

Future Roadmap: Personalization, Loyalty, and Feedback Strategy

Customer Personalization

- Personalized Recommendations:** Integrate AI-based product recommendation systems that can suggest items to customers based on their past purchases and browsing history.

Enhanced Customer Engagement:

- Loyalty Programs:** Build a loyalty program that rewards repeat customers with points, discounts, and/or exclusive offers.

Improving the Customer Feedback :

- Customer Feedback Loops:** Actively collect customer feedback through surveys or online reviews, especially for underperforming categories like **Health & Beauty**.

Thank You & Call to Action

By focusing on key product categories, adjusting pricing strategies, and optimizing inventory management, we are poised to drive growth and enhance customer satisfaction across all locations. Let's work together to bring these recommendations to life and see the results
